PROFESSIONAL SUMMARY

Computer Engineering student specializing in Full Stack Development and AI Engineering, with hands-on experience designing REST APIs, authentication systems, real-time applications, RAG pipelines, and distributed systems. Proficient in JavaScript, TypeScript, React.js, Node.js, Express.js, MongoDB, MySQL, Redis, Docker, and AI/LLM application development. Pursuing roles in Software Development, Full Stack Development, Backend Engineering, or AI Engineering.

EDUCATION

Modern Education Society's Wadia College of Engineering Pune, Maharashtra
Bachelor of Engineering in Computer Engineering Expected June 2027

EXPERIENCE

Alpha Innovations May 2026 – July 2026
Web Development Intern 3 Months

- Built and maintained responsive web pages using HTML, CSS, and JavaScript, applying modern web development practices to improve site performance and usability.
- Collaborated with a cross-functional team to design UI enhancements and implement new features, conducting testing and debugging to ensure functional accuracy and reliability.

PROJECTS

- RecallX – AI Retrieval & Knowledge Platform** | *RAG, LLMs, Embeddings, Vector Search* [Code](#)
- Engineered a Retrieval-Augmented Generation (RAG) platform that retrieves relevant external knowledge to deliver grounded, context-aware LLM responses.
 - Architected an end-to-end pipeline covering document processing, chunking, embedding generation, semantic retrieval, and contextual response generation.
- Packet – Distributed Content Delivery Network** | *CDN, Redis, AWS/S3, Docker* [Code](#)
- Designed a low-latency content delivery network to optimize caching, asset retrieval, and origin server offloading.
 - Implemented Redis-backed caching with intelligent request routing, cache invalidation, object storage integration, and containerized deployment via Docker.
- CivicPulse – Intelligent Civic Issue Platform** | *React, Node.js, Express.js, MongoDB, AI* [Code](#)
- Developed a full-stack civic engagement platform enabling citizens to report, track, and prioritize public issues in real time.
 - Designed role-based workflows and administrative dashboards to connect citizens, administrators, and resolution teams, streamlining issue resolution.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, JWT, bcrypt
Databases: MongoDB, MySQL, PostgreSQL, Supabase
AI / Systems: RAG, LLMs, Embeddings, Vector Search, Redis, CDN Architecture
Tools: Git, GitHub, Docker, AWS, Postman

CERTIFICATIONS

- REST API (Intermediate) – HackerRank Certificate
- SQL (Intermediate) – HackerRank Certificate
- AWS (Intermediate) – HackerRank Certificate
